

the kwik change screen system

KWIK快速换版系统

市场上最高效、通用和有成本
效益的换版系统

*... the most efficient, versatile
and cost effective screen
system available*

G. G. Cade Technologies Ltd.

THE KWIK CHANGE SYSTEM SOLVES ALL THE PROBLEMS OF SCREEN PREPARATION:

KWIK换版系统解决所有网板制备的难题

- How can we make screens more quickly?
如何加快网版制作速度?
- How do we make screens without skilled labour?
如何不依赖技术娴熟工人也能制作网版?
- How do we minimise the 'down time' when changing screens?
如何在最短时间内完成换版，减少停产时间?

The Kwik Change Screen System is a new approach to screen preparation:

KWIK换版系统是网版制备的新方法

- **UP TO 20 TIMES FASTER THAN USING A STRETCHER AND ADHESIVES.**
比用传统的拉网机和胶水制版方法快20倍以上
- **SCREEN CHANGES UP TO 10 TIMES FASTER.**
换版快10倍以上
- **NO STRETCHER, NO ADHESIVES AND NO TIME LOST WAITING FOR ADHESIVES TO DRY.** 不需要拉网机，不需要用胶水，不需要浪费时间等待胶水烘干
- **NO NEED FOR SKILLED LABOUR.**
不需要依赖技术娴熟工人
- **EVERY SCREEN CAN BE SET TO EXACT FABRIC TENSION REQUIRED FOR THE PRODUCT.** 每个网版的张力可以设置成产品要求的网布张力
- **LIGHT WEIGHT, LONG LIFE FRAMES - FRAMES LAST UP TO 10 YEARS.**
网框轻便，寿命极长，可用长达10年
- **HIGHEST SCREEN QUALITY USING ONLY STAINLESS STEEL SCREEN FABRICS FROM**
网版质量按最高标准配备，采
 **用来自BOPP的不锈钢网布**

The Kwik Change Screen System solves all the problems of screen preparation yet **COSTS LESS** than traditional screens.

KWIK换版系统解决所有网版制备问题却比传统网版成本更低

GGC

Screen slides easily on to the frame
固定尺寸的网布直接滑入网板框

SCREEN PREPARATION

网版制备

Using a simple jig, screens can be assembled and tensioned, ready for coating, with photo-emulsion within 6 minutes. The same process with a stretcher and adhesives can take up to 2 hours. 使用简单的装配夹具，网布可以被组装和绷紧，6分钟内准备就绪等待上感光胶。同一步骤使用拉网机和胶水需要长至2个小时。

Having attached the Contact Bars, tension is applied with the side and end adjuster screws.

装上接触条，两边和两头的螺丝就可以给网布上张紧力

The special profiles lock together under tension to prevent loss of tension.

特殊型钢上紧组装，避免张力损失

SCREEN EXPOSURE

网板曝光

After coating, Kwik Change Screens are exposed in the special Exposure Jig which gives perfect registration between the positive and the screen and enables multi colour designs to be pre-registered so that all positives are aligned exactly with the jig and the screens. This eliminates the need to adjust screens on the printing machine.

上胶后，KWIK网板在特殊曝光夹具的协助下完美定位多色设计，减少网版在丝印机上的调试时间。

VERSATILITY

通用性

Kwik Change Screens can be fitted to **any** screen printing machine. 可安装于任何机型

End Mount Frames for Dubuit, Strutz, Rosario and Kammann machines.

Side Mount Frames for Tecno 5 and Fermac machines.

DEVELOPMENT

持续发展和改进

The Kwik Change Screen System is constantly being developed to suit new applications.

We recently introduced the Kwik Change Mug Frame which is a special deep frame with angled and insulated ends flanges to print handled products.

We can offer frames up to 600mm long and 300mm wide to print large storage jars, jugs and other very large products.

EQUIPMENT

装备

We manufacture all the necessary equipment to use the Kwik Change Screen System including:

我们提供所有使用KWIK换版系统所需的配套装备

- **Assembly Jig** 组装工具
- **Exposure Jig** 曝光工具
- **Pressure Pads and Coating Troughs to match the screen size** 压力片和匹配网版尺寸的上胶槽
- **Contact Bars** 接触条
- **Screen Clips** 网布夹
- **Posi-Loc Locator Discs to give extra support to end mount frames** 两头固定式网框的配套工具
- **Complete range of screens in from 150 mesh to 500 mesh and including Twilled and Calendared weaves** 网布系列从150目到500目都有, 也有斜纹网布和压光网布

TRAINING

培训

In addition to the comprehensive Kwik Change User Guide manual, we also provide full on-site training courses for new customers.

除了提供使用说明外, 也可以按要求现场培训 (收费)

INFORMATION

信息

Full details of the Kwik Change Screen System, together with Case Studies, can be found on our website at www.ggcade.co.uk/kess/html

We offer a CD-ROM which shows the easy Kwik Change assembly process. This is available FREE OF CHARGE.
